

World of Sounds

A journey to your inner music.
Inspired by our authentic range of instruments
that attain body, soul and mind.

Sela[®]
the soul of sound

Sela Handpans

Handmade and unique

The handpan is the perfect combination of percussion and melody instrument. It consists of two steel bowls. As part of their manufacturing process, the halves are elaborately hammered by hand. This creates dents and a small hill in the middle of the body. These surfaces become the various sound fields. The central note is located in the middle and is surrounded by a circle of eight further notes.

Sela Handpans convince with their bright, long-lasting sound. The unique, soft, ethereal and mysterious sound of this instrument captivates everyone and takes the listener on a spiritual journey. It can be used perfectly as a musical accompaniment for spiritual activities such as yoga or meditation.

The sound fields respond easily. Even the smallest nuances can be heard while playing. An expressive and detailed performance is the result. It impresses with quality and sound on a high level. The handpan has a pleasant resonance vibration across all tones. It immediately convinces with its long-lasting sound. The tones are cleanly separated from each other. Sela Handpans are professional tuned.

A high-quality and padded bag is included in the scope of delivery. Thanks to its good padding, it provides optimum protection during transport. The tear-resistant nylon bag can be carried easily by hand with the two handles or comfortably as a backpack with the adjustable shoulder straps. Small accessories such as a metronome can be stored in the practical outer compartment.

Sela Tongue Drums

Meditative & harmonic sounds

The Sela Melody Tongue Drum is a handy steel tongue drum with a diameter from 14 centimetres to approx. 25 centimetres. With its warm and soothing sound, it is suitable for relaxation in everyday life as well as for the early musical education of children. The tone fields create typical sounds when playing Sela tongue drums, which enchant the listener and transport them to a land of peace and harmony.

Since all notes of the Melody Tongue Drum fit together harmoniously, a melodious sound is always created without any "wrong" notes. Therefore, this instrument is not only recommended for experienced music lovers and professional sound therapists, but especially for beginners without any previous musical knowledge.

To get you started right out of the box, each Sela Melody Tongue Drum comes with two high-quality mallets with birch wood handles and round rubber heads. The tone fields can also be struck with the fingers. Thanks to its compact size, the Sela Melody Tongue Drum can be stored anywhere - at home, in the office, in the yoga studio or in your luggage. For safe transport, a practical cotton bag is included, which is lined with red velvet on the inside. Rubber feet ensure a secure stand, and a rubber ring protects the outer edge of the tongue drum from scratches and dents.

Sela Harmony Singing Bowls

Handmade and unique

Sela Harmony Singing Bowls are handmade masterpieces in the tradition of Tibetan singing bowls. They produce long-lasting, spherical sounds with a piercing fundamental and a broad, harmonious overtone spectrum. All Sela Harmony Singing Bowls are made in India, have a shimmering matte finish and stylish engraving on the inside. Sela Harmony Singing Bowls are available in seven different sizes, allowing you to experience different pitches and vibrational ranges.

For music, meditation and singing bowl therapy

Sela Harmony Singing Bowls are suitable for making music as well as for meditation, yoga sessions and sound massages. Their soothing voice can help relieve stress, deeply relax and bring body and mind into harmony. Sela Harmony Singing Bowls can be played individually or combined with other singing bowls, Sela Handpans and other instruments to take listeners on a multi-layered sound journey.

Each Sela Harmony Singing Bowl comes with a useful set of accessories. The included mallet is particularly noteworthy, because it represents a combination of a classic felt mallet and a friction wood. The singing bowl can therefore be played with the round felt head or gently rubbed with the leather-covered handle and made to sing, whereby the sound of the instrument unfolds in different ways. A cotton bag with drawstring and red velour lining protects the singing bowl during transport, a felt ring ensures a secure stand and optimal vibration behavior when playing the Sela Harmony Singing Bowl.

Sela Crystal Singing Bowls

Spherical and long lasting sounds

Modern interpretation of the Tibetan Singing Bowl

Crystal singing bowls, like the traditional variants made of bronze or brass alloys, produce spherical, long-lasting sounds with a powerful fundamental and "singing", harmonic overtones. In direct comparison, the modern variant made of glass even resonates somewhat more clearly and significantly longer than its metallic counterpart. The material used is given excellent sound properties by a special manufacturing process in which glass is melted down and brought into the desired shape by a centrifuge. Visually, the instrument is rounded off by a chic frosted glass design with a rough, white surface.

For music, meditation and singing bowl therapy

Sela crystal singing bowls are suitable for making music as well as for meditation, yoga sessions and sound massages. Their soothing voice can help relieve stress, deeply relax and bring body and mind into harmony. The Crystal Singing Bowls can be played individually or in combination with other singing bowls or other instruments, such as the Sela Handpans.

Useful accessories included

The Sela Crystal Singing Bowls come with a wooden mallet specially designed for use with crystal singing bowls. With its handle made of Asian Shima wood, it lies extremely comfortably in the hand and its rubber head enables both the gentle striking and rubbing of singing bowls. In addition, an included silicone ring ensures a secure stand and optimal vibration behavior of the bowl - so it can unfold its full sound potential at any time.

Sela Infinity Singing Bowls

Spherical and long lasting sounds

Singing Bowls in their most elegant shape

The Sela Infinity Singing Bowls stand out especially by their light weight and noble design from conventional Crystal Singing Bowls. Despite the lower mass, the Infinity Bowls prove to be very resonant and impress with a remarkable volume. Infinity Singing Bowl are made of 99.9% pure quartz crystal. The material used is given excellent sound properties by a special manufacturing process in which quartz is melted down and brought into the desired shape by a centrifuge. Visually, the instrument is rounded off by a noble, colorful shimmering clear glass design, which emphasizes different color nuances depending on the incidence of light.

Crystal singing bowls, like the traditional variants made of bronze or brass alloys, produce spherical, long-lasting sounds with a powerful fundamental and "singing", harmonic overtones. In direct comparison, the modern variant made of glass even resonates somewhat more clearly and significantly longer than its metallic counterpart.

For music, meditation and singing bowl therapy

Sela crystal singing bowls are suitable for making music as well as for meditation, yoga sessions and sound massages. Their soothing voice can help relieve stress, deeply relax and bring body and mind into harmony. The Infinity Singing Bowls can be played individually or in combination with other singing bowls or other instruments, such as the Sela Handpans.

Useful accessories included

The Sela Infinity Singing Bowl comes with a leather mallet specially designed for use with crystal singing bowls. It fits comfortably in the hand and allows both gentle striking and rubbing of singing bowls. Depending on the technique and intensity, a variety of different tones can be elicited from the Infinity Singing Bowl. In addition, an included silicone ring ensures a secure stand and optimal vibration behavior of the bowl - so it can unfold its full sound potential at any time.

Sela Infinity Singing Bowls

Made from 99.9% pure quartz crystal

Sela Gongs

Handmade Traditional Gongs

Sela Gongs are real masterpieces, handmade in China from a special bronze alloy. They are available in sizes of 20, 24, 28, 32 and 36 inches. The larger the model, the deeper and also more voluminous the sound when struck. Included with each model is a maple mallet with a plastic head with velvet cover and a zippered carrying case.

The Sela Chau Gongs have a traditional shape with a rim that curves backwards. Sela Wind Gongs have an almost flat shape with the outer rim not bent backwards.

The Gongs are available in two finishes, Standard and Lotus. The Sela Lotus Gongs particularly stand out due to their elegant lotus design, which is worked into the outer area. The lotus flower is also known as the "flower of life" and has many spiritual meanings - among other things, it stands for purity of heart, creativity, wisdom and enlightenment.

Gongs are an integral part of many cultures around the world and produce soothing, long-lasting, esoteric sounds. Depending on how hard, where and with what the Sela Gong is struck, different frequency ranges come to the fore. It can be played in a much more versatile way than it might seem at first.

Because of their relaxing effect, gongs are used in meditation and sound therapy, among other things, as their vibrations penetrate the whole body. But percussionists also like to use a gong as a special effect in musical and orchestral contexts.
